

JABARAJ R

Software Developer — Full-Stack & Mobile (React, React Native, Node.js)

Coimbatore, Tamil Nadu, India | 8220317251 | jabarajrajapandi@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Developer with 3 years 10 months of full-time professional experience (4.5 years including internship) building scalable web and mobile applications for product-based and enterprise clients. Skilled in React.js, React Native, TypeScript, Redux Toolkit, and Micro Frontend Architecture on the front end, and Node.js/Express.js with working knowledge of ASP.NET (Clean Architecture) on the back end. Experienced with Azure DevOps for agile task management and CI/CD, IIS deployment, Firebase, and OAuth 2.0 based authentication. Currently building Manufacturing Execution System (MES) solutions for global manufacturing clients. Passionate about writing clean, maintainable code and delivering high-performing, user-focused products.

SKILLS

- Front-End: React.js, React Native, TypeScript, JavaScript, Redux Toolkit, Micro Frontend Architecture, Material UI, Fluent UI, Bootstrap, SASS, CSS, HTML
- Back-End: Node.js, Express.js | Working knowledge: ASP.NET (Clean Architecture)
- Databases: SQL Server (SSMS), MySQL, Firebase
- Architecture: Clean Architecture, MVVM, MVC, Micro Frontend Architecture
- API Development & Auth: RESTful APIs, JWT, OAuth 2.0
- Cloud & DevOps: Google Cloud (OAuth), Azure DevOps (Boards/Tickets & CI-CD), IIS, Git/GitHub
- Mobile Tools: Android Studio, Gradle | Platforms: Web, Android | OS: Windows, Linux

WORK EXPERIENCE

Software Developer — Cantier Systems Pvt Ltd

May 2025 – Present

AI-powered Manufacturing Execution System (MES) product company (Cantier MES 4.0) serving automotive, semiconductor, electronics, aerospace, and food & beverage industries.

- Developed and maintained enterprise MES web modules using React.js, TypeScript, and Redux Toolkit for real-time shop floor monitoring and manufacturing intelligence dashboards.
- Built and maintained a React Native mobile application for client MRF on Android, enabling real-time production tracking and monitoring, and coordinated with the team on iOS builds via CI/CD.
- Contributed to backend services and APIs using ASP.NET following Clean Architecture principles for scalable, maintainable systems.
- Implemented Micro Frontend Architecture to enable independent development and deployment of modular UI features across multiple client projects.
- Deployed and managed web applications using IIS, and handled database design, queries, and optimization using SQL Server Management Studio (SSMS).
- Used Azure DevOps for sprint planning, task/ticket tracking, and release management, improving team delivery predictability.
- Delivered features for leading manufacturing clients including SMT, MRF, Sona Comstar, Lumax, Aequs, and Brakes India.
- Contributed to Industrial IoT and machine condition monitoring features supporting predictive maintenance and OEE (Overall Equipment Effectiveness) tracking.

Software Developer — SparkDial Online Services Pvt Ltd

April 2022 – May 2025

Product-based company; developed the Spark Redeem voucher and payback platform across mobile and web.

- Developed React Native mobile applications with MVVM architecture, primarily building and testing on Android while collaborating with the team on iOS builds and releases.
- Built responsive and dynamic web UIs using React.js, boosting user engagement by 35%.
- Designed and developed RESTful APIs using Node.js and Express.js, improving back-end performance by 20%.

- Integrated Firebase for real-time data sync, push notifications, and authentication, and implemented secure authorization using JWT.
- Managed application state efficiently using Redux across mobile and web applications for improved scalability.
- Optimized app performance, reducing load times by 30% and improving overall responsiveness.
- Designed and maintained APIs using Node.js and MySQL, ensuring robust and reliable data handling.
- Deployed applications to the Google Play Store; collaborated with the team on Apple App Store submissions and compliance.
- Collaborated with UI/UX designers, back-end developers, and project managers to deliver high-quality products using Git/GitHub for version control.

PROJECTS

Cantier MES 4.0 — Manufacturing Client Solutions | *React.js, React Native, TypeScript, ASP.NET, Clean Architecture, Micro Frontend Architecture*

AI-powered Manufacturing Execution System platform delivering real-time operational visibility, predictive maintenance, and shop floor traceability for discrete and process manufacturing industries.

- Built web modules for manufacturing clients including SMT, Sona Comstar, Lumax, Aequs, and Brakes India using React.js and Micro Frontend Architecture.
- Developed a React Native mobile application for MRF for real-time production monitoring.
- Built backend services with ASP.NET using Clean Architecture, and managed data with SQL Server.

Spark Redeem Mobile App | *React Native, React.js, Node.js*

A payback application connecting customers and vendors, offering discounts to vendors and voucher-based offers to customers on every purchase.

- Developed key modules including Newspaper, Auto Consulting, Real Estate, Live Meet Streaming, and KwikPay.
- Built cross-platform UI components with React Native, achieving an app rating of 4.5/5 on stores.
- Created scalable APIs with Node.js and integrated third-party libraries for improved functionality.

Growcher Mobile App | *React Native, React.js, Node.js*

A voucher-system application similar to Spark Redeem, built independently end-to-end.

- Independently developed a voucher-based app, including its admin panel and APIs.
- Integrated KwikPay for smooth payment processing.
- Designed responsive admin panels using React.js for efficient app management.

I-Robo Chakra Mobile App | *React Native, React.js, Node.js*

An app connecting institutes, franchises, admins, sub-admins, coaches, parents, and students.

- Developed front-end components with React Native for a seamless user experience.
- Built a robust back-end with Node.js and integrated MySQL for data management.

Spark Redeem Web Panels | *React.js, Node.js, MySQL*

Web panels designed to manage and control the Spark Redeem mobile app.

- Created responsive web panels (Affiliate, Consultancy, ERP, Influencer, Sub-Admin) for app management.
- Used Node.js to develop a scalable back-end architecture and JWT for secure authentication.

EDUCATION

B.Sc. Information Technology — Bharathidasan University, Coimbatore, India

2023 – 2026

Diploma in Production Engineering — Government Polytechnic College, Coimbatore, India

Aug 2012 – May 2014

CONFERENCES & PRESENTATIONS

- Conducted Zoom meetings focused on business development strategies to enhance outreach and growth.
- Delivered instructional sessions to students at SparkDial Academy, sharing technical knowledge and fostering learning.
